

HOTEL MARKET POSITIONING

USING HOTEL SUPPLY, QUALITY TIERS,
AND AMENITIES TO SCREEN POTENTIAL
MARKETS.

PROJECT GOALS

- 01 IDENTIFY WHERE THE HIGHEST CONCENTRATION OF HOTELS ARE
- 02 IDENTIFY THE MARKET SHARE OF HOTEL TIERS FROM BUDGET TO LUXURY
- 03 FIND OUT WHICH MARKETS SHOW TOURISM DEMAND, BUT NOT AS COMPETITIVE
- 04 FIND 5 MARKETS THAT ARE SUITABLE FOR LUXURY-FAMILY TRAVEL

DATASET SNAPSHOT

What the dataset includes:

1,000,000 +

rows of data from hotels around the globe

LOCATION

(country, city, coordinates)

HOTEL QUALITY

(star ratings)

DESCRIPTIONS

(facilities and descriptions)

TOP 10 COUNTRIES

by hotel count

UNITED STATES

had the highest volume of hotels

Key Takeaway:

High volume helps identify patterns, but it does not automatically mean opportunity.

TOP 10 CITIES

by hotel count

LONDON, UK ORLANDO, FL

Had the highest volume of hotels
by a large margin

What this means:

While the demand is proven, these
markets are highly **competitive**
and not easy to break into.

**HOW ARE HOTEL TIERS
DISTRIBUTED IN THE TOP
CITIES & COUNTRIES?**

Understanding the Data:

- Most hotels are mid-range or unrated
- Luxury properties make up a very small percentage of the global hospitality market
- The UK and Australia had much larger portions of upscale and luxury hotels than other top countries

SEOUL

Tons of options for budget travelers

KUALA LUMPUR

Something for everyone

CORNWALL

More luxury options for the discerning traveler

LUXURY MARKETS

Luxury Hotel Supply Is Concentrated in Major Travel Markets

UK, UAE, BALI

Dominate the luxury market

Next steps:

These are going to be saturated markets, so what we want to look for are mid markets where there is clear demand for both family travel and luxury travel, but the luxury share is relatively small.

PIVOT

At first, I looked for cities with many hotels and a below-average supply of luxury hotels, but that was too broad. Large markets kept rising to the top, even when they were already saturated, so I looked into a different question:

**WHERE DOES FAMILY TRAVEL APPEAR TO EXIST,
BUT LUXURY-FAMILY AMENITIES SEEM MORE SCARCE?**

KEY AMENITY GROUPS

keywords to define different types of stays

FAMILY

family, children, kids, babysitting

WELLNESS

spa, wellness, massage, fitness, sauna, yoga

BUSINESS

business, conference, meeting, desk, work

LUXURY

luxury, elegant, premium, exclusive, spa, suite

RESORT

resort, beach, pool, leisure, villa, garden

BUDGET

budget, basic, affordable, hostel, guesthouse

WHAT SEPARATES LUXURY FROM MID-RANGE HOTELS?

FITNESS, WELLNESS, POOL, FAMILY, BUSINESS, AND LAUNDRY
(not very exciting, but that's what the data says)

1. Pulled keywords from descriptions and facilities text to help identify the hotel types based on amenities.
2. Grouped by budget, mid-range, upscale, and luxury tiers
3. Identified most common amenity groups per tier, signaling which amenities were considered luxury.

EXPLORING GAPS

Not all 5 star hotels are created equal

KEY INSIGHTS:

- High bars means these luxury markets have most of the amenities identified with luxury stays (fitness, wellness, pool, family, business, and laundry)
- Lower ratings (like London) may suggest a more urban setting where robust amenities aren't necessary/expected. Luxury might have a different meaning in these locations.

THE MARKET GAP

To screen for luxury-family opportunity, I compared family amenity signals in the overall hotel market against family amenity signals within luxury hotels only. **A larger gap suggests that families may already be served by the broader market, but not strongly by the luxury segment.**

ENRICHING FAMILY JOURNEYS

Modern parents seek multigenerational travel that offers luxury without sacrificing quality. Combining nature, culture, and engaging experiences gives families the chance to create core memories while embracing comfort.

HOW I SCREENED FOR CANDIDATE MARKETS

- 01 IDENTIFY**
Pinpoint cities with a strong market, but not overly competitive.
- 02 CONFIRM**
Confirm existing luxury market.
- 03 MEASURE**
Measure family amenities in the broader market.
- 04 COMPARE**
Compare family amenities to luxury properties to see where the gaps are.
- 05 SHORTLIST**
Shortlist cities with the largest gap.

Bar chart illustrating family-luxury amenity gap across selected markets

THE FAMILY-LUXURY AMENITY GAP

Family amenities appear in the broader market, but show up less often within the luxury segment. That gap helped identify markets worth deeper research

MARKET OPPORTUNITIES

GOLDEN SANDS, BULGARIA

Coastal resort with beautiful beaches, offering family leisure activities and a strong candidate for luxury development.

MALINSKA, CROATIA

Seaside resort town on Krk Island with beaches, outdoor activities, and a relaxed coastal feel; a strong candidate for family-oriented luxury travel.

MORZINE, FRANCE

Alpine mountain town with outdoor activities for all seasons. Best for families with school-aged children looking for adventure and wellness.

FURTHER ANALYSIS

DEMOGRAPHICS

Look into who's visiting the city, and confirm the luxury family market fits

HOTEL PERFORMANCE

ADR, occupancy, RevPAR, seasonality. See if the demand is steady or seasonal.

COMPETITORS

Identify luxury / family-friendly properties, see what they offer, what they lack, and if they already served the niche.

LOCAL ACTIVITIES

research nature, culture, food, beaches, museums, and kid-friendly enrichment.

AIRPORT ACCESS

Check the closest major airports and direct flight options. Family travel prioritizes convenience.

THANK YOU!
